

### Executive Contributor

**Jay Wilson**

*Senior Vice President and General Manager*

*Carrier Networks Division*

*ADTRAN, Inc.*

<http://www.adtran.com/>

Jay Wilson joined ADTRAN in 1998 as a product support engineer and subsequently has held several positions of increasing responsibility within the Carrier Networks Division, where he is currently senior vice president and general manager. His responsibilities include all engineering, marketing, sales and support for ADTRAN's carrier products and customers globally. Prior to his current position, Jay served as vice president of product marketing, where he played a key role in the development and introduction of several of ADTRAN's market leading access solutions that are widely deployed by communications carriers around the world.

Before joining ADTRAN, Jay served in a number of management roles for Wyle Laboratories. Wyle is a leading independent testing and engineering services provider to the telecommunications, aerospace/defense and nuclear equipment qualification industries. At Wyle, his responsibilities included sales, marketing and engineering. He led the company effort to become a U.S. nationally recognized test laboratory (NRTL), which expanded Wyle's portfolio of services and included compliance and adherence to a myriad of quality, reliability and regulatory standards. Some of those included ETSI, FCC, IEC, IEEE, Bellcore, ANSI/UL, ASTM, SAE, DOT among many others.

Jay holds a Bachelor of Engineering degree in Electrical Engineering from Vanderbilt University, where he has served on the Advisory Board for the Department of Electrical Engineering and Computer Science. He also serves on the Advisory Council for Randolph School in Huntsville, where he resides with his wife Katie and their three children.
