

## **Session Summary**

**Lakshminarayanan Rangaswamy**

### **Agile Methodology – Route to Successful Delivery**

The presentation demonstrates how Cognizant Technology Solutions has used agile methodology in the telecom project with volatile customer requirement to minimize customer reported problem and 100% OTD. Several projects were analyzed to identify improvement action that in turn led to a modified execution methodology increasing quality and performance for the entire product line. The case study articulates the Software Development Lifecycle Model that enables all the telecom projects to deal with volatile requirements.
